## RESEARCH INTERESTS

My research investigates how the social environment influences individual behavior and cognition by integrating ecological, behavioral, physiological, and neuromolecular perspectives. I have explored this topic via the monogamous prairie vole *Microtus ochrogaster*, the western mosquitofish *Gambusia affinis*, and social African cichlid *Astatotilapia burtoni*.

**Keywords:** animal cognition, social neuroscience, behavioral ecology, individual variation, neural gene expression, cortisol, testosterone, dopamine, vasopressin

**EEB Graduate Student Representative, 2018-2019**

As the student representative, I attended faculty meetings and disseminated information. I organized town hall events, designed and administered a survey on the graduate student curriculum, developed a student writing group, and advocated for student concerns.

**EEB Program Mentorship Plan, 2019**

As the EEB Graduate Student Representative I implemented a Mentoring Plan designed to clarify expectations/responsibilities between incoming students and their advisors. The Mentoring Plan is a survey-like document that the student and advisor complete together soon after the student arrives. This plan is also being used as a template for the UT CMB (Cell & Molecular Biology) Graduate Program.

**EEB Graduate Program Course Offering Survey, 2019**

I developed a survey taken by students across six cohorts of EEB Graduate Students that provided insight on which topics students feel need to be taught, are currently being taught, number and types of courses required for graduation, and prior training undertaken.

**Graduate Student Panelist– First Year Subject and Skills Course, 2019 & 2020**

I presented with three other senior graduate students on topics including how to begin research projects, TA responsibilities, mentorship, and on-campus resources for graduate students.
